Maestro Wireless® remote lighting control

never enter a dark home again™

Maestro Wireless® | never enter a dark home again™

easy to use

convenience and flexibility around your home

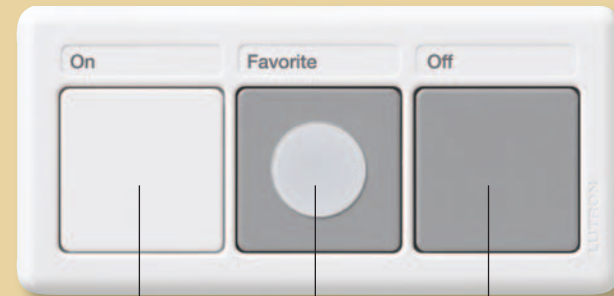

Enhance your safety by conveniently controlling your home's interior and exterior lights from your car.

The Maestro Wireless controller easily attaches to your car's visor, and is compatible with HomeLink®-equipped vehicles.

Carry the controller with you to turn on your lights as you approach your home.

Maestro Wireless® controller

typical range up to 100 feet

turn dimmer(s) on to 100% brightness
turn dimmer(s) on to your favorite light level
turn dimmer(s) off

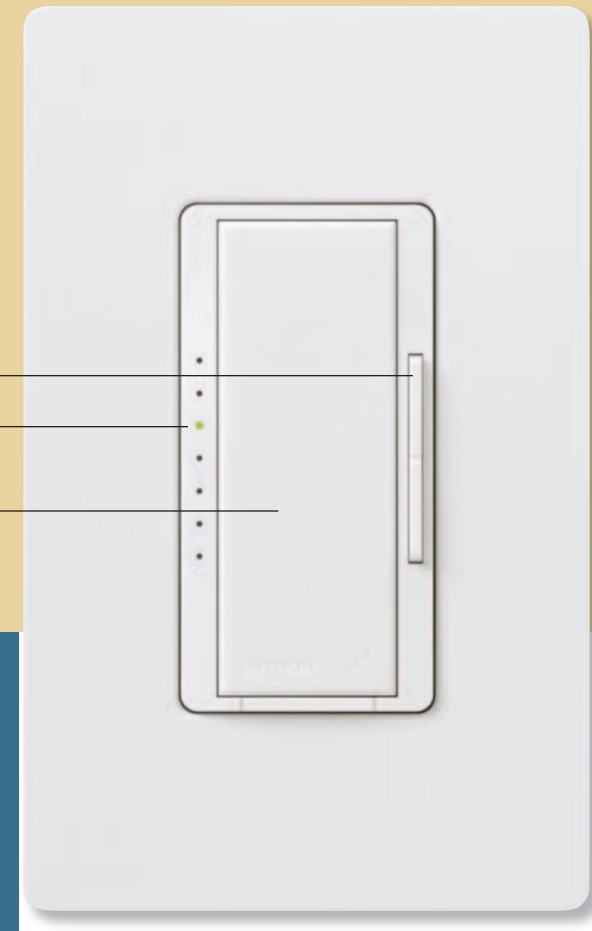

Maestro Wireless® dimmer

rocker adjusts light level to suit any activity

LEDs indicate light level, as well as glow softly, so you can find the dimmer in the dark

large tapswitch turns light on/off to preset level; tap twice for full on, press and hold for delayed fade-to-off

Maestro Wireless uses radio frequency (RF) technology. RF signals travel through walls and floors so you don't have to be in the same room as your lights to control them. Each wireless controller has over a half-million unique addresses... so you don't have to worry about your neighbor's signal interfering with yours.

Maestro Wireless dimmer with screwless wallplate in white

Take advantage of the dimmer's flexibility by installing it wherever you want wireless control of your lights:

- porch
- foyer
- mudroom
- kitchen
- hallway
- outbuilding
- garage
- boat dock
- stairwell
- nursery

The wireless controller allows you to control the lights you need – when you need them.

Place it on a bedside, mount it on a wall, or use it as a hand-held device. You can purchase controllers separately, allowing you to control each dimmer with up to four wireless controllers.

easy to install

Replace your existing switch with the Maestro Wireless dimmer in as little as 15 minutes to gain wireless control.
